

The Houstonian Club Renovation details:

1. Members will experience a spectacular new entrance to the upstairs fitness center via an expansive staircase lit by a new skylight from above and which enters onto an indoor, turfed performance zone approximately the size of a tennis court. This area will offer a wider variety of personal training options, and will also be available for individual Member use. Archways surrounding the upper fitness center area will allow visibility of this space from below.
2. The indoor basketball court will be relocated, but will remain an indoor air-conditioned basketball court. We will be using the same type of neo-shock, wood flooring we have in the existing court and the basketball court will be approximately the same size as the current court and will have two viewing areas.
3. The Resident Workout Room will be upgraded and relocated so Resident Members have a beautiful view of the outdoor pools and foliage.
4. We will have an indoor/outdoor separate adult and family-friendly dining in a beautiful, relaxed environment overlooking the pools. The adult area will include a fully-appointed indoor bar, and adult outdoor deck and the family dining will allow access to our family-friendly deck and the Resort Pool.
5. A new Starbucks and grab-n-go juice bar will open with seating next to the brilliantly lit atrium.
6. The club will offer Members a larger, luxurious shopping experience in the newly appointed Shop and pop up structure adjacent to the restaurant.
7. We're excited to have a comfortable gathering place for socializing and relaxation with fellow Members, with a variety of multi-purpose seating options under the skylight of the atrium.
8. The three larger custom-designed studios equipped with state-of-the-art sound, lighting, surfaces, and storage will greatly enhance the group exercise experience. Yogis will be able to relieve stress and connect to their senses, as they gaze upon nature through the beautiful outdoor window. Our group exercise participants will have designated spaces to gather and socialize before and after classes.
9. The Studio 360 and Tred & Shred studios will be combined and conveniently located near the group exercise studios and offices to form a cohesive and accessible programming area.
10. The Kids' Gym will be surrounded by windows, and adjoin the newly modernized Bungalow space providing an open and visible span between both play spaces. A custom designed Ninja-Warrior fitness structure is planned for the newly appointed Kids' Gym space. For added convenience there will be dual check-in stations for both areas and a designated stroller parking area.
11. Weight Management programming will be created by our Registered Dietitian and fitness team conveniently available in the current Results Center. Additional services provided by physical therapists (including specialized recovery equipment) will be provided in a nearby space.
12. Attractively designed gathering spaces, including a card room will be updated and reappointed.
13. Two superbly appointed, brand new meeting rooms will overlook the outdoors on the east side of the Club.
14. Aesthetic and inspiring common areas such as the Lobby, Welcome Desk, and reception areas will greet you each day with more seating and get-together areas. Light will pour into the entrance and flow into the existing Rotunda, designed to preserve the history of the Club with updated flooring, lighting, paint colors and furnishings.
